

Privacy Policy

NeutronEncyclopedia is a free application that collects or stores no data of any kind.

No account creation, no email required, no report, no analytics.

NeutronEncyclopedia is a mere player of its own files. That's all.

A link to "CD-ROM available! Buy online..." still exists at the end of the application. This was inherited from the original CD-ROM version "Exploring matter with neutrons" and could not be deleted. Don't worry, the link points to a server that no longer exists. Anyway who needs a CD-ROM nowadays !

The NeutronEncyclopedia team <neutronencyclopedia@ill.fr>
