Session no: 46

Subject: Chemistry

Category: Training workshop

Title: Chemistry demonstrations in the classroom

Presenter: Maurice Cosandey

Abstract:

Objectives
Help chemistry teachers show simple chemical concepts safely in front of the class, with minimum material.

Background
The participants should be chemistry teachers at the level of French “lycée” or Swiss “gymnase”, i.e. for beginning students, without prior knowledge of chemistry.

Preliminary agenda
About ten practical demonstrations with real chemicals can be carried out in front of the audience.
